SVALA

Design by Stefan Borselius & Thomas Bernstrand

Simple but obvious

Over the years, Stefan Borselius and Thomas Bernstrand have worked together on various notised furniture design projects. Now they are once again making a common product, but this time in the service of lighting and have designed our new discreet pendant luminaire Svala.

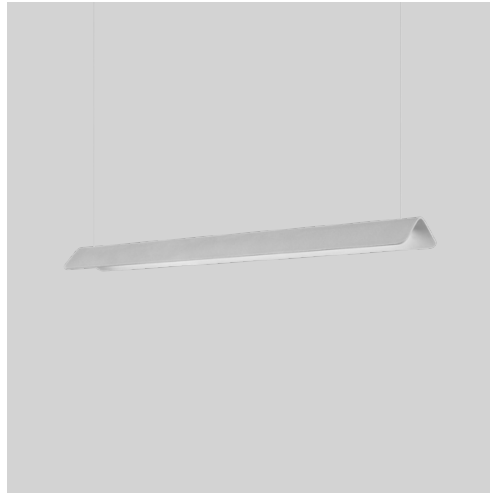

"We wanted to create a pendant luminaire that is as simple as it is obvious. Above the light source, a sheet of aluminum balances which makes the luminaire float easily over the table, like a swallow."

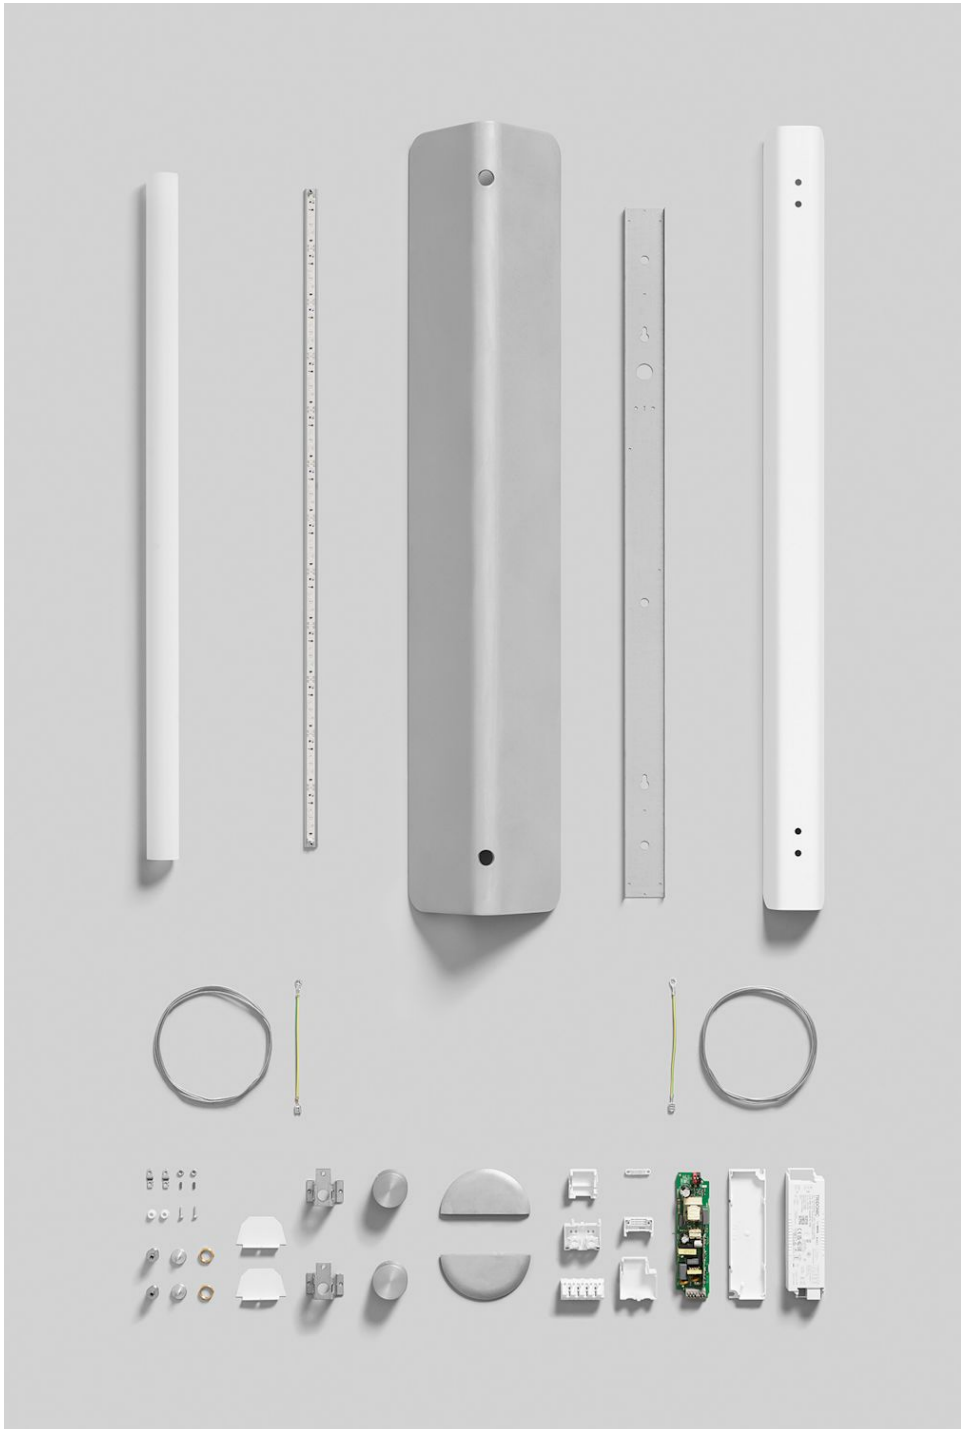

● **Black**
RAL9005 G50 fine texture

● **Raw**
Aluminium

○ **White**
NCS S 500-N G20 Fine texture

Technical specifications
