TIPI

Design by Mårten & Gustav Cyrén

A portable camp fire

"The simplicity is important. It shouldn't feel too high-tech", says designer Mårten Cyrén as he reflects on the shape of Tipi.

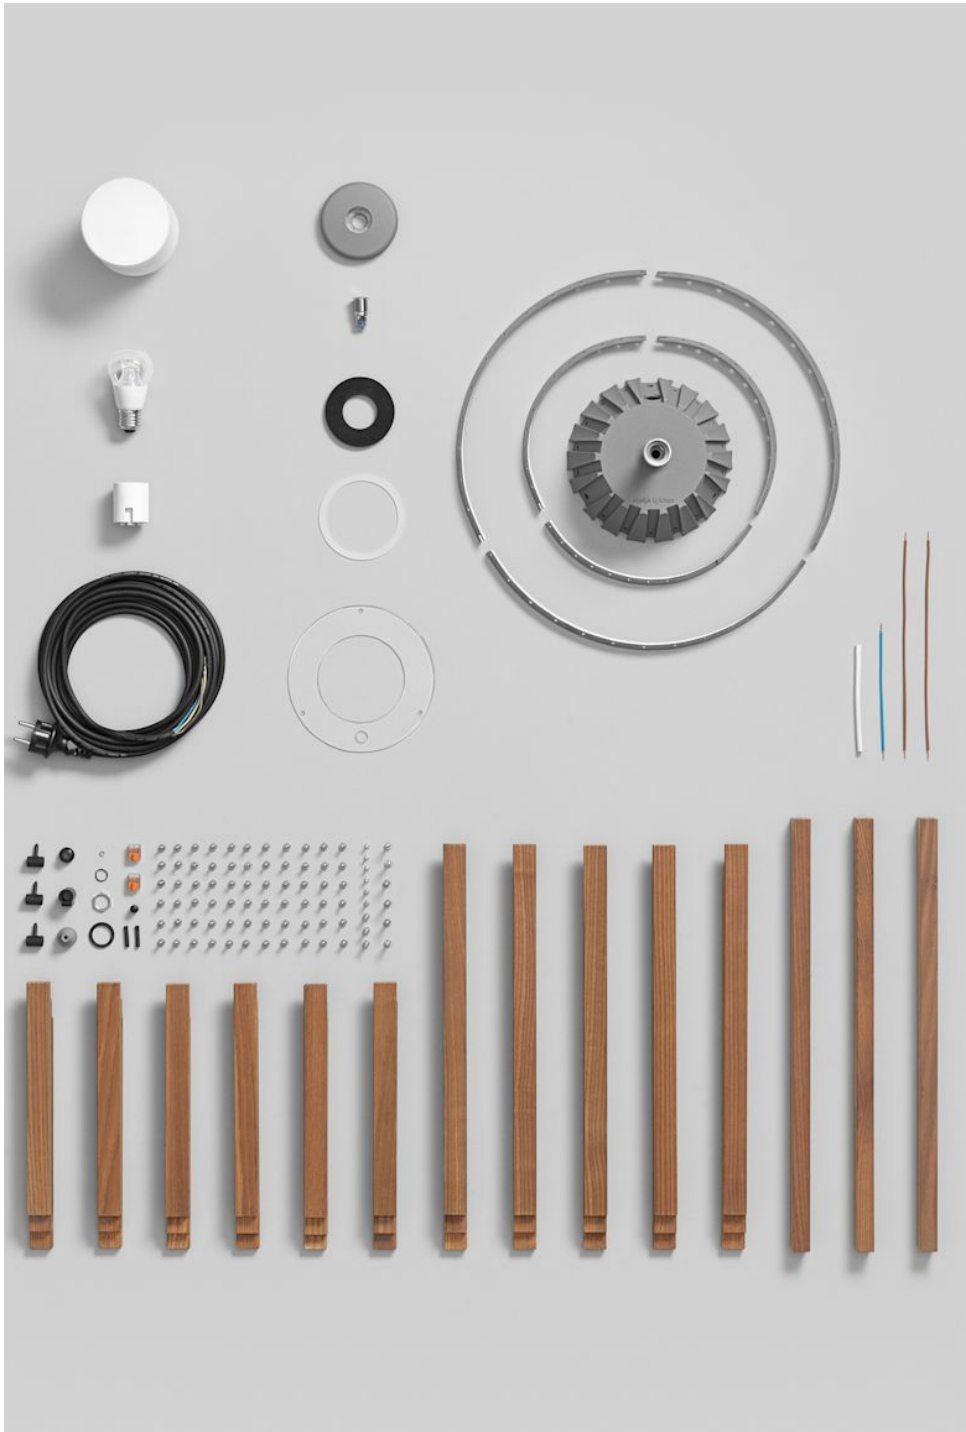

Tipi is a floorlight for both outdoor and indoor use, made from slats of heat-treated ash wood. The handle and top part are made of aluminium. The inspiration for the lamp originates from the Swedish North, among the sticks and twigs and soothing sounds of the Swedish woods.

Ash

Technical specifications

Material	Handle and top part in die-cast aluminium. Tube and circular structure in stainless steel. Wooden slats in heat-treated ash wood.
Assembly	Tipi comes in four parts; a light engine and three leg parts that are easily mounted into a cone that snaps into the light engine.
Connection	Delivered with black rubber cable 3x0.75 mm², length 4.5 m with earthed plug.
Light source	Recommended light source LED-bulb with E27 fitting.
Standard finish	Natural dark ash wood with details in aluminium RAL9007 textured and stainless steel.
